

# Biology Bricks Activity

## Stormy Planet

Jupiter has a distinctive feature, the Great Red Spot on its outer surface, and we know it has been going for well over 300 years.

In this activity, you will recreate the storms on the planet.

*You will need:*

- *Clear mason jar with tight-fitting lid*
- *Teaspoon*
- *Vinegar*
- *Dishwashing liquid*
- *Water*
- *Glitter*

## Instructions

1. Add water to the jar until it about three-quarters full.
2. Place 2 teaspoons of vinegar into the jar.
3. Place 1 teaspoon of dishwashing liquid into the jar.
4. Sprinkle some glitter into the jar.
5. Screw the lid on the jar so it has a tight fit.
6. Hold the jar so that your hand is around the middle but the jar is still facing up. Use a circular motion to swirl the contents around the jar.
7. Watch what happens to the contents as you swirl it.
