

Biology Bricks Keywords

What This is About

Please use this document to help further your knowledge, by printing out the keywords associated with the relevant page.

This document is set up for you to cut out the keywords (and laminate them if you think it will help), to be used as a quick guide reference for the subject matter that is included.

Warning

Please note: the keywords included in this document are those that link with the page subject matter. They may relate to other pages as well, but they are meant for the page that the link is provided from. Use them as a resource as you so wish.

Printing

Please feel free **not** to print this page of the document, it is merely a reference and information page.

Food

We all need to eat, and food is the way we do it. But having food security means that there is enough food for everyone at the right time.

Security

We all need to eat, and food is the way we do it. But having food security means that there is enough food for everyone at the right time.

Famine

Some countries suffer with famine, where there is not enough food for everyone. This is highlighted especially by UNICEF, who show Ethiopia as a country with high famine.

Pests

Some parasitic pests can affect the amount or yield of crops or foods we have or maintain. They can be controlled through genetic modification, or pesticides.

Pathogens

A pathogen is something that can affect a plant (and humans) and hamr them so that they don't grow properly, or enough to feed us.

Climate Change

Climate change is a factor that can affect the amount or rate of production of foods for us, whether it be yield because of a lack of heat, or transportation issues due to something like flooding.

Birth Rates

Birth rates are controlled in some countries due to the amount of people living there. China, for example, only allows one child per family.

Farming

We farm foods so we can eat, and there are many different ways we can do this – intensive farming, organic farming, factory farming and monoculture farming are some techniques.

War

War and conflict have a serious impact on what we eat, and how much we can eat. Just look at rationing during World War Two, which in the UK, didn't completely finish until 1954.

Conflict

War and conflict have a serious impact on what we eat, and how much we can eat. Just look at rationing during World War Two, which in the UK, didn't completely finish until 1954.

Cultures

Different cultures eat different types of food, There are ingredients in some cooking that use many different spices, herbs and sauces.
