

# Biology Bricks Keywords

---

## What This is About

Please use this document to help further your knowledge, by printing out the keywords associated with the relevant page.

This document is set up for you to cut out the keywords (and laminate them if you think it will help), to be used as a quick guide reference for the subject matter that is included.

## Warning

**Please note:** the keywords included in this document are those that link with the page subject matter. They may relate to other pages as well, but they are meant for the page that the link is provided from. Use them as a resource as you so wish.

## Printing

Please feel free **not** to print this page of the document, it is merely a reference and information page.

## Pollution

Pollution can be many things, from creating carbon dioxide using your car, or creating too much noise.

## Physical

A physical pollution is something that is put into the environment. This includes using our cars, which puts carbon dioxide into the air.

## Mechanical

Mechanical pollution is the overuse of devices, in so that you replace them often. So, if you replace your mobile phone every year, you're creating mechanical pollution,

## Biological

Biological pollution includes mould, mildew, house dust, pollutants inside the home, viruses and more.

## Chemical

Chemical pollution is a chemical that is not meant to be in the ecosystem it is in. For example, when there's an oil spill in the sea.

## Destructive

Destructive pollution is when we destroy things like forests or wooded areas to make room for things we want like new buildings.

## Recycling

Recycling is a way to reduce the amount of physical pollution in the environment. It also accounts for other forms of pollution, as we don't have to make the materials in the first place.

## Devices

Use of devices like mobile phones and computers is fine, until we need to get rid of them. Unless we recycle them, they can cause pollution.

## Pollutant

A pollutant is something that turns up in a place it shouldn't be in. It can be man-made pollutants or natural.

## Unnatural

Unnatural pollution is something man-made being placed in a natural environment.
