

# Biology Bricks Keywords

---

## What This is About

Please use this document to help further your knowledge, by printing out the keywords associated with the relevant page.

This document is set up for you to cut out the keywords (and laminate them if you think it will help), to be used as a quick guide reference for the subject matter that is included.

## Warning

**Please note:** the keywords included in this document are those that link with the page subject matter. They may relate to other pages as well, but they are meant for the page that the link is provided from. Use them as a resource as you so wish.

## Printing

Please feel free **not** to print this page of the document, it is merely a reference and information page.

## Bioindicator

A bioindicator helps us understand what is going on in the environment, studying changes like pH balance, moisture and more.

## Biotic Factor

All bioindicators have a biotic factor, which contribute to the way the environment around them are associated.

## Organism

Organisms living within an ecosystem or microsystem allow us to detect changes in the environment.

## Stressors

When an area is stressed of something, these can be monitored – like a once vivid growth of an organism deteriorating for example.

## Environment

The environment which organisms live that show us what conditions they live in.

## Sampling

We regularly sample areas to find out more about an area that has been hit by stressors or changes in the environment they live in.
