

Biology Bricks Keywords

What This is About

Please use this document to help further your knowledge, by printing out the keywords associated with the relevant page.

This document is set up for you to cut out the keywords (and laminate them if you think it will help), to be used as a quick guide reference for the subject matter that is included.

Warning

Please note: the keywords included in this document are those that link with the page subject matter. They may relate to other pages as well, but they are meant for the page that the link is provided from. Use them as a resource as you so wish.

Printing

Please feel free **not** to print this page of the document, it is merely a reference and information page.

Biotechnology

Technology-based biology, including genetic modification, production of insulin, and other technologies to help create food.

Mycoprotein

Mycoprotein, a type of fungus that can be grown en-masse to eat, is fermented in vats.

Fermenters (vats)

Fermenters in form of vats are used to make mycoprotein. It is a process of fermentation to enable production to scale.

Haemophilia

A condition where someone does not heal wounds very well, and needs coagulating medication to help.

Fusarium patch

A patch of grass that has a fungal disease that turns it yellowish and brown. Also known as snow mould.
