

# Biology Bricks Keywords

---

## What This is About

Please use this document to help further your knowledge, by printing out the keywords associated with the relevant page.

This document is set up for you to cut out the keywords (and laminate them if you think it will help), to be used as a quick guide reference for the subject matter that is included.

## Warning

**Please note:** the keywords included in this document are those that link with the page subject matter. They may relate to other pages as well, but they are meant for the page that the link is provided from. Use them as a resource as you so wish.

## Printing

Please feel free **not** to print this page of the document, it is merely a reference and information page.

## Smoking

Smoking is a bad habit, an addiction that cause serious disease within your body.

## Cancer

Cancer is linked with smoking and vaping, and although it can be treated, ultimately it can lead to fatality.

## Lungs

Your lungs are vital for your life, as you breathe in oxygen through them. When you smoke or vape, this effect is decreased.

## Tar

Tar is one of the most deadly chemicals in a cigarette. If you smoke a lot of cigarettes, this can lead to lung cancer and other diseases.

## Low Oxygen Intake

When you smoke, you have a much lower rate of oxygen intake, due to the lungs not functioning properly.

## Lung Cancer

Lung cancer has long been linked to excessive smoking or vaping, and makes the insides of your lungs black.

## Increased Risk

If you smoke or vape, there is an increased risk to contracting diseases, some curable, some fatal.

## Exacerbation

When you can't breathe in the oxygen we need, it is called exacerbation. It becomes more difficult to move and do other everyday things we do.

## Homeostasis

Smoking and vaping can cause serious effects to your homeostasis, such as loss of appetite, decrease in focus, temperature increase or decrease.

## Chemicals

There are many chemicals in a cigarette, and also in the juices used for vaping, including tar and benzene.

## Disease

A disease caused by smoking or vaping can be fatal, but can also be treated.

## Emphysema

Similar to COPD, this restricts the amount of oxygen you can take in through your lungs.

## **COPD (Chronic Obstructive Pulmonary Disease)**

COPD is a disease that severely decreases your ability to intake oxygen, and affects mainly the lungs, but can affect other organs.
